

F-SERIES

Network-Enabled Thermal Security Cameras

CUTTING EDGE THERMAL SECURITY CAMERAS, NOW WITH COMPLETE NETWORKING AND INTEGRATION FLEXIBILITY

F-Series thermal security cameras let you see intruders and other threats to your facility's security clearly in total darkness and in bad weather. Fully enabled for control and operation over digital and analog networks, F-Series imagers are available in 160 x 120, 320 x 240, and high-resolution 640 x 480 formats, providing up to four times the image clarity and longer threat detection range performance than lower resolution cameras.

BENEFITS OF F-SERIES THERMAL SECURITY CAMERAS:

- High-quality 24/7 thermal video security coverage
- Broad range of lenses available: 9 mm, 13 mm, 19 mm, 35 mm, 65 mm, and 100 mm for angular FOVs from 48° to 4.6°
- Exchangeable camera cassettes allow for quick upgrade or repair of sensors and optics
- Both IP and serial control interfaces for easy integration into digital networks or analog video environments.
- Open IP standards for plug-and-play integration and configuration in digital networks
- Multiple channels of streaming digital video available in H.264, MPEG-4, or M-JPEG formats
- Built-in web interface that enables comprehensive system setup and configuration capability
- Serial control and analog composite video output enable ready integration into legacy network designs
- Simultaneous digital and composite video output
- Fully compatible with a host of third-party accessories
- FLIR Sensor Manager single-device version included
- Auto Digital Detail Enhancement (DDE) built in for optimal image quality across all scene conditions
- High contrast imagery optimized to get the most out of video analytics software to create virtual perimeters
- No need for the expense and complication of added lighting infrastructure
- Clear vision in challenging conditions (lowlight, no light, backlight, haze, smoke, fog, etc.)

Camouflaged suspects are invisible to daylight CCD, but people can't hide their heat from FLIR thermal imagers.
